

OFFICE OF THE MANAGING DIRECTOR

NAC AND TSI SIGN LANDSIDE SECURITY SERVICES CONTRACT

The National Airports Corporation (NAC) and Tactical Solutions International Limited (TSI) have formalized arrangements for the provision of Landside Security Services at the Port Moresby International Airport.

Both organizations signed the Contract Agreement today, allowing TSI to provide Security Services for NAC's landside operations commencing on the 1st of February, 2024.

TSI is contracted by NAC to provide security for monitoring access control at the landside check points, monitoring vehicle movements at the carpark locations and providing security surveillance at all landside locations. Their contract does not include passenger and baggage screening inside the terminal.

The Contract Agreement is for a term of two years, ending on the 31st of January, 2026.

TSI was selected as the successful bidder last year through a stringent bidding process who fulfilled the bidding requirements and was determined as the lowest evaluated substantially responsive bidder.

"As the state-owned airport operator, NAC is responsible for maintaining Safety and Security compliance at the security designated airports for which NAC is responsible for in line with National Civil Aviation Rules (CARs) of Papua New Guinea and the International Civil Aviation Organisation Standards and Recommended Practices (SARPs)," said Dominic Kaumu, Acting Managing Director and CEO of NAC.

"The Landside Security Service will complement the Airside Security Service provided by NAC to further strengthen security at the airport. This agreement signifies NAC's commitment in maintaining compliance in relation to aviation security services and we're pleased to work with TSI as a reputable security services provider to fulfill the requirements for aviation security services at Jacksons International Airport." Mr Kaumu added. //End

Approved for release

A handwritten signature in blue ink, appearing to read 'A. Kaumu'.
